STORM SAFETY AT OUR POOLS

American Pools, our contractor, follows the recommendations set by the National Lightning Safety Institute regarding pool safety procedures. Specifically, according to the National Lightning Safety Institute, at the first sound of thunder or sighting of lightning, all persons will be cleared from the pool and remain clear for at least 30 minutes. If thunder or lightning persists, the pool will remain closed for 30 minutes after the last sound of thunder or sighting of lightning.

An additional factor to consider, however, is whether or not the sky is dark and threatening. Unless there are evident signs of clearing, the storm should not be considered “ended.” The pool will reopen when evidence of clearing is present and no further danger from lightning is observed. When the pool is closed for weather-related issues, ALL patrons will be asked to leave the facility until it is reopened. This applies to both the Outdoor and Indoor Pools.

BEFORE YOU FLUSH...

Please refrain from placing industrial products (e.g. paper towels, debris) down the toilet or drain. These products were not designed to be flushed or washed down drains. Doing so can lead to severe back-

ups that affect your neighbors. Costs to repair damage from such may be assessed to your unit.

We encourage you to dispose of these products according to local laws and Association rules and regulations.

ALEXANDRIA RESTAURANT WEEK TO-GO

Enjoy Alexandria Restaurant Week at home this summer and show your support for locally-owned restaurants in the City. Now through August 30, more than 60 restaurants offer a \$49 takeout, delivery or curbside pick-up dinner for two during Alexandria Restaurant Week To-Go. Restaurants are in the West End, Old Town, Del Ray and Carlisle. For details, visit <https://www.visitalexandriava.com/restaurants/restaurant-week/>.

WASHING MACHINE HOSES

Manufacturer-supplied hoses for new washers are not strong enough to withstand the necessary water pressure high-rise buildings require. Additionally, defective hoses result in serious leaks that may affect multiple units. Owners are responsible for regularly inspecting the hoses and replacing them if needed. They are also checked prior to the sale of a unit during the Re-sale Inspection.

Our Handyman Service is able to replace your hoses for you, or you can follow these specifications:

- Pressure-tested at a minimum of 120 lbs./in.²
- 6 ft. minimum length
- “L” shaped connections
- Reinforced webbing
- Superior brass crimp coupling
